The Writing's on the Wall

A joint project of the European School Brussels II Climate Academy and News Decoder

A new way to teach
CLIMATE CHANGE EDUCATION

How many of your students understand the systemic nature of the climate crisis, beyond polar bears, plastics and recycling?

The Writing's on the Wall project aims to address the gap between knowledge and action by offering a new way for schools across Europe — and the world — to integrate climate change into their curricula with a fun, fact-focused initiative combining activism, art and journalism.

From September 2022 to July 2023, participating schools can access **thought-provoking workshops** on climate issues, **interactive webinars** with experts, **professional development** for educators and student **training** in journalism and multimedia, including a **storytelling competition**. All project materials will be available on an open access webspace.

Learning Goal #1

Deepen your school's response to the climate crisis with data-centered workshops, an online bank of climate teaching resources and a guide to painting a mural that sparks dialogue

Learning Goal #2

Access journalism training and publishing platforms that strengthen students' media literacy and climate understanding, help tackle disinformation and inform and inspire their peers and parents

Learning Goal #3

Build knowledge and develop global citizenship, communication and presentation skills in six live, interactive global webinars convening climate experts and youth worldwide

2022–23 TIMELINE OF ACTIVITIES

- **OCT–NOV:** ORIENTATION & CLIMATE SCIENCE WORKSHOPS (LIVE & RECORDED)
- **OCT–JUNE:** TRAINING & MENTORING STUDENTS TO CREATE MULTIMEDIA CONTENT
- **OCT–JULY:** INTERACTIVE WEBINARS WITH CLIMATE EXPERTS & STUDENTS
- **NOV–JUNE:** PROFESSIONAL DEVELOPMENT RESOURCES FOR EDUCATORS
- **FEB-APRIL:** OPEN-ACCESS STORYTELLING STUDENT CONTEST

Co-funded by the European Union
